Apple processing machine

ASETSM-E

The original only from FEUMA.

For perfect processing

The apple processing machines of the **ASETM** and **ASETSM** model series are special-purpose machines intended for peeling and coring apples having a calibre of between 55 and 85 mm. Splitting into wedges is possible in general.

The ASETSM model allows slice cutting in addition. Slice cutting and dividing can also be combined to produce fine apple pieces for salads or cakes.

A spring-mounted and adjustable peeling knife perfectly adapts to the shape and size of the apple so as to largely compensate any unevenness and achieve an even peeling result.

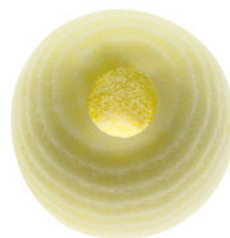

made in
Germany

- ✓ Multifunctional, easy to operate
- ✓ High food safety, conforming to HACCP and FDA
- ✓ Versatile accessories

Function and principle of operation

Perfect processing in 3 stages

1. Manually put on the apples.
2. Peel the apple (slice cutting only with ASETSM).
3. Core and /or split the apple into wedges.

ACCESSORIES

Tools

- A wide range of dividing stars allows cutting apples into between 2 and 24 wedges
- Various fan-type knife sets allow slices with a thickness of between 3.5 and 30.0 mm (ASETSM only)

Base cabinet

- Mobile, with 4 castors and a location for placing GN containers

Separating system

- Separates fruits and peels
- Easy installation – placed under the apple peeling machine without any screw connections or the like
